

HAS YOUR HOME EXPERIENCED ANY OF THESE TROUBLES?

- Drains that empty slowly?
- Drains that give off an odor?
- Drains the gurgle or bubble?
- Toilets that often clog?
- Toilets that overflow?

IF SO, IT MAY BE A WARNING SIGN THAT YOUR MAIN SEWER LINE COULD BACK UP

Some homes 15 years or older may have serious issues with their sewer line. If your home is a similar age, it may have similar issues. If left untreated, it could lead to a sewer back-up which can spew biohazards materials, including feces, toilet paper, storm run-off and more into your home. It could:

- Damage furniture, electronics, valuables, and more
- Cost thousands of dollars to repair (and many insurance policies do not cover it)
- Require intense clean-up that includes the removal of flooring and drywall
- Leave a foul odor that can remain for weeks
- Create a risk of mold developing

Sewage back-ups can occur with out warning. However, sometimes signs are present... including continual problems with your drains and toilets. (The specific warning signs are listed above.)

KD Navien

TANKLESS WATER HEATERS AND COMBINATION BOILERS

- 98% Efficiency
- Dual Stainless Steel Heat Exchangers for ultimate efficiency and longevity
- PVC vented
- Buffer Tank eliminates cold water sandwich
- Leak and Freeze Protection
- Best Warranty on the Market today
- Never wait for hot water!
- Built in Recirculation pump saves over 12,000 gallons of water annually
- Endless hot water, never run out of hot water again
- Installed by Licensed, Navien Certified Technicians
- Combination boiler/tankless hot water heater models available for space heating applications
